

# How to use the Admin Console

Note: Only individuals who have been granted administrative access in KidCheck (as an Administrator, Campus Manager, Or Start/Stop) can access the admin console.

## Android Tablet/iPad Station:

During check-in, the admin console allows admins to see information on who is checked in, check-out accessibility, send text messages to guardians, and more.

- 1) Select the **Gear** Icon in the right hand corner
- 2) Enter your admin username and password
- 3) Click on a child's name to see more information or send a text message

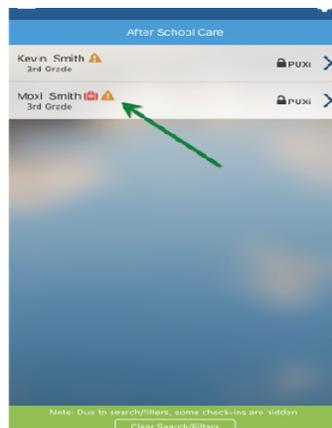

## Admin Console App:

With the new KidCheck Admin Console App, there's no need to use a check-in station or web browser to see the classlist or communicate to parents. It has the flexibility of knowing the locations of the kids on the go!

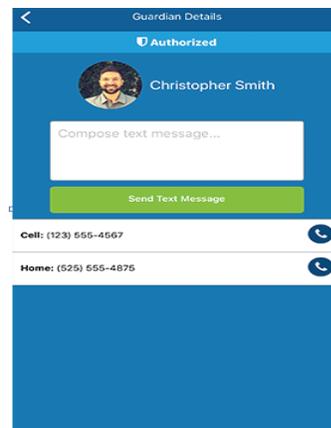

- 1) Download the **KidCheck App** on a device
- 2) Log-in using your admin username and password
- 3) Select the **Gear** icon
- 4) Select the **Filter** icon to manage locations
- 5) Select a child and it will show the **Child Detail Policy**. The child detail policy lists important information such as medical info, check-in time, date of birth and more.
- 6) Under the **Guardian list**, select a guardian to send a text message to contact parents
